

DIY WIRE MESH MEMO BOARD

Step by step Guide

What You'll Need:

- Drill (Electric Screwdriver) / Hammer
- Mesh Panel
- Spray Paint
- Screws

STEP 1

Measure the space that you have free for the panel.
Purchase the right size, or if you are only able to purchase a bigger panel, cut it to size.

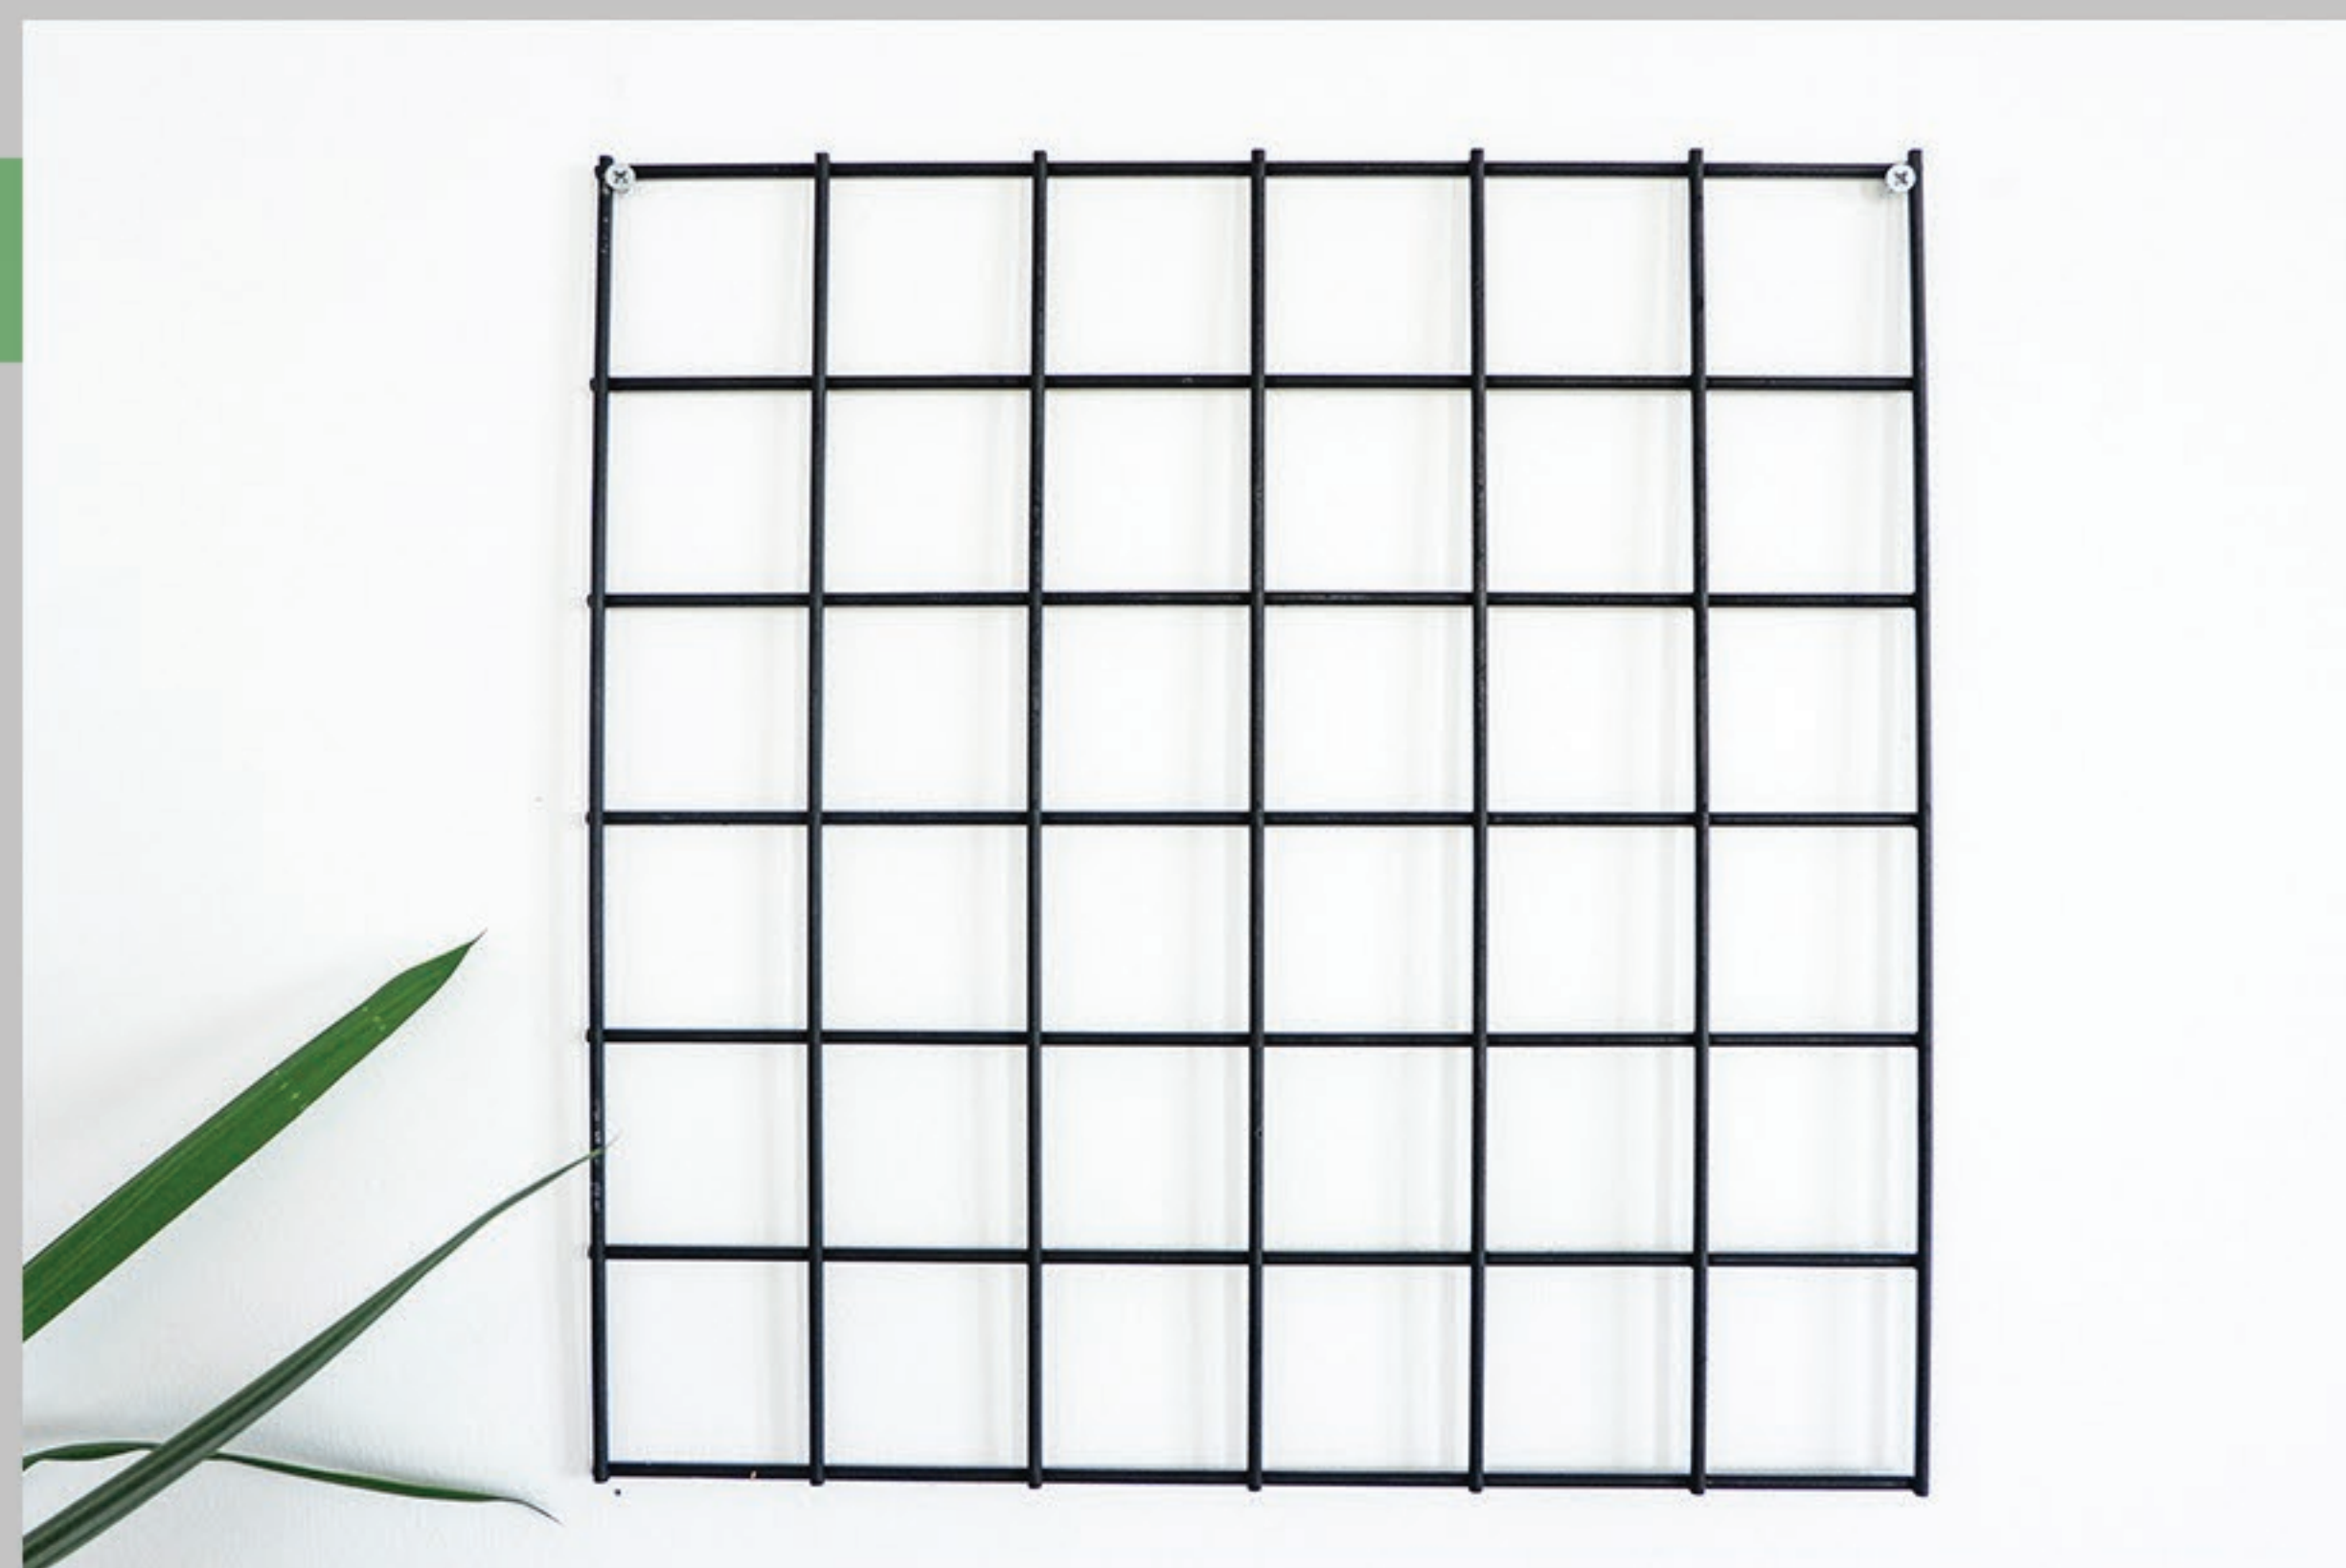

STEP 2

Use a spray paint suitable for metals and follow the instructions on the label to paint the panel. Once painted, let it dry before hanging it on the wall.

STEP 3 - METHOD A

You can hang the grid with many different methods. The easiest is using screws. Drive 2 screws into the wall – one at each of the top corners of the panel and hang the board on them.

STEP 3 - METHOD B

Another easy way is to stand it up on your desk. Make sure that you place it on a non slippery surface so it doesn't fall when decorated.

STEP 4

You can hang anything on the mesh with simple clothespins or clips. From notes to photos and other memories, such as tickets, festival bracelets and more... the possibilities are endless and the only limit is your imagination.
